📍 THANJAVUR - TAMIL NADU - INDIA

PROFILE SUMMARY

Dynamic and passionate Computer Science student with strong skills in Artificial Intelligence, Full-Stack Development, and Problem-Solving. Experienced in developing real-time projects and delivering innovative, efficient solutions. Eager to apply technical expertise and creativity in a challenging internship role to contribute to impactful projects and enhance professional growth.

PATENT

SYSTEM FOR ENHANCING QUALITY OF WATER CAN THROUGH QR CODE

The present invention relates to the field of quality management and control. More specifically, the present invention is related to developing a solution for drinking safe water and promoting sustainability in our day to day life.

AI-DRIVEN PUBLIC HEALTH CHATBOT FOR DISEASE AWARENESS - SIH

Developed an AI-powered public health chatbot providing real-time disease awareness, symptom checking, and health guidance via WhatsApp/SMS. Implemented scalable, multilingual, and ethical AI features to enhance healthcare accessibility and community awareness.

INTERNSHIP

- Successfully completed virtual internship on Artificial Intelligence and Data Analytics focused on Green Skills, organized by **AICTE** without stipend.
- Successfully completed virtual internship on Microsoft Azure by Microsoft Elevate initiative in collaboration with the **AICTE** without stipend.

EDUCATION

HIGHER EDUCATION - 2022

MAXWELL MATRICULATION HIGHER SECONDARY SCHOOL

MARK: 509/600 **PERCENTAGE:** 84.8/100

BACHELOR ENGINEERING 2023 - 2027

K.RAMAKRISHNAN COLLEGE OF ENGINEERING

- Computer Science And Engineering
- **CGPA:** 7.94 / 10

N P T E L CERTIFICATIONS

- Internet Of Things (78 %)
- Cloud Computing (55 %)
- The Joy of Python (42 %)

G O B A L CERTIFICATION

- AWS by Amazon

L A N G U A G E

- ENGLISH
- TAMIL

PROJECT	SKILL
STUDENT DATABASE MANAGEMENT SYSTEM Developed a Student Database Management System to efficiently manage and retrieve student records with secure and user-friendly data handling. E-COMMERCE SHOPPING CART PROJECT The E-Commerce Shopping Cart System is an object-oriented project that allows customers to browse products, add or remove them from a shopping cart, and place orders.It demonstrates core OOAD principles like encapsulation, inheritance, and association through classes such as Product, Customer, ShoppingCart, and Order. SNAKE GAME The Snake Game is a Java program using Swing and AWT where a snake moves on the screen and eats fruits to increase its length and score.The game ends when the snake hits the wall or its own body, and a restart option allows the player to play again. SALES DATA ANALYSIS The sales-data-analysis project analyzes sales datasets using Python libraries like Pandas and Matplotlib to clean, process, and visualize data. It helps identify trends such as top-selling products, sales by country, and monthly sales patterns to support better business decisions	• Java Fullstack • Python • Java • C Programming • MY SQL • CSS • HTML
	TOOLS USED
	• V S Code • Eclipse • GitHub • MySQL Workbench • Power BI
	VOLUNTEER EXPERIENCE
	Encrypt Heurka - Technical Club • Co ordinator - FunFest’25 • Co ordinator - Hex Tech’25 • Co ordinator - Qube IT’24
ONLINE COURSE	SOFT SKILL
• DIGITAL SKILLS: ArtificialL Intellignce By Accenture • DIGITAL SKILLS: Web Analytics By Accenture • Data Science & Analytics By BOORD • Agile Project Management By HP LIFE • AI For Beginners Cybersecurity Awareness By HP LIFE • Full stack course By Skillup • Communication skills By TCS • MongoDB basics By MongoDB • Microsoft Azure course by Microsoft • Protection from Browser Attacks by Connecting Dreams • Java full stack course by SkillUp	• Leadership • Team Work • Adaptability • Time management • Analytical Thinking
